

German Standards ACSR Conductor

APPLICATION

ACSR is a concentrically stranded conductor composed of one or more layers of Aluminium alloy wire stranded over a high-strength zinc coated (galvanized) steel core.

STANDARDS

German Standards DIN 50182(OLD STAND DIN 48204-APR 1984)

CONSTRUCTION

Conductor

Aluminum Wires, concentrically stranded over a central wire/core of Galvanized steel.

THE CABLE TEST

We have world-class testing facility, and made rigorous testing regime, every meter of cable before leaving the factory must go through strict testing, testing qualified products will be shipped to customers, effectively ensure product quality and meet customer requirements.

SUSTAINABILITY COMMITMENT

Guowang Cable actively implements the "carbon reduction" goal, strives to promote the green's low-carbon transformation, strengthens energy-saving and emission reduction technology innovation, and promotes the company's healthy and sustainable development.

* These values are given for information only

The information contained within this datasheet is for guidance only and is subject to change without notice or liability. All the information is provided in good faith and is believed to be correct at the time of publication. When selecting cable accessories, please note that actual cable dimensions may vary due to manufacturing tolerances.

American Standards ACSR Conductor

APPLICATION

ACSR is a concentrically stranded conductor composed of one or more layers of Aluminium alloy wire stranded over a high-strength zinc coated (galvanized) steel core.

STANDARDS

American Standards ASTM B231/B231M-99

CONSTRUCTION

Conductor

Aluminum Wires, concentrically stranded over a central wire/core of Galvanized steel.

THE CABLE TEST

We have world-class testing facility, and made rigorous testing regime, every meter of cable before leaving the factory must go through strict testing, testing qualified products will be shipped to customers, effectively ensure product quality and meet customer requirements.

SUSTAINABILITY COMMITMENT

Guowang Cable actively implements the "carbon reduction" goal, strives to promote the green's low-carbon transformation, strengthens energy-saving and emission reduction technology innovation, and promotes the company's healthy and sustainable development.

* These values are given for information only

The information contained within this datasheet is for guidance only and is subject to change without notice or liability. All the information is provided in good faith and is believed to be correct at the time of publication. When selecting cable accessories, please note that actual cable dimensions may vary due to manufacturing tolerances.

British Standards ACSR Conductor

APPLICATION

ACSR is a concentrically stranded conductor composed of one or more layers of Aluminium alloy wire stranded over a high-strength zinc coated (galvanized) steel core.

STANDARDS

British Standards BS EN 50182

CONSTRUCTION

Conductor

Aluminum Wires, concentrically stranded over a central wire/core of Galvanized steel.

THE CABLE TEST

We have world-class testing facility, and made rigorous testing regime, every meter of cable before leaving the factory must go through strict testing, testing qualified products will be shipped to customers, effectively ensure product quality and meet customer requirements.

SUSTAINABILITY COMMITMENT

Guowang Cable actively implements the "carbon reduction" goal, strives to promote the green's low-carbon transformation, strengthens energy-saving and emission reduction technology innovation, and promotes the company's healthy and sustainable development.
